8. **ACTIVITY LOG** ~~(CONTINUE ON REVERSE)~~

TIME	MAJOR EVENTS
0001 - 8/6/99	Continue to construct dozer line around the Slavgoski's Ranch. Floyd Slavgoski's house at greatest risk of being burned down. Floyd Slavgoski is father to Dave. Dave + Floyd
	Floyd Slavgoski's place is ~~an~~ a mobile home set on a foundation at the mouth of a drainage on the southeast side of the Slavgoski Ranch property. The drainage is a steep rocky drainage consisting of thick P/J. We were unable to construct a dozer line right behind the house. Build the dozer line upon the ridge, which left unburned P/J between line and house. Front of house is protected by a meadow.
	Build line around Slavgoski Ranch until ~~0130~~ 2400. I spoke to Will Johnston let him know I would monitor fire and told the dozer operators to catch a couple of hours of sleep since they had been working w/only 1 hour

NFES 1337

TIME	MAJOR EVENTS
	& sleep since 8/4/99. Fire was slowly moving down ridge w/ occasional trees torching off.
	AT ~~0130~~ 0400 Will Johnston, decided to do a back burn around Lloyd Slawgoski's place to protect the house. Fire still hadn't reached the dozer line & was still burning slow. Dave Slawgoski wanted us to ~~burn~~ burn out to protect the house. We started all the engines & WT up into the area and dozers in order to back burn off the dozer line and stop the fire.
	Outcome of these efforts were ① backburn wouldn't work area would burn couldn't get the fire of fuels to burn to carry the fire back to the area that was burning. ② Almost rolled engine Ruby MTD 95 when the road gave way under the tires (left rear tire). Had to get the NDF Dozer #1 and Rand dozer to hold the engine on the road (NDF dozer) and pull the engine out (Rand dozer). ③ people were so tired speech on the radio was garbled ④ There was no organization to the tactics. people were irrate/short tempered at each other (fire fighters) directions were unclear - no one knew what was going on or what the operational procedures were.
	Engine 52 & Cg - NDF dozer #2 had been were building line southwest toward Bruffey Ranch and ~~Rand~~ Dozer bedded down sometime between 0130 - 0430. Engine 52 returned to backfire operations.
	By ~~0400~~ 0400 hours everyone had returned to the Slawgoski ranch house and bedded down until 0500 hours. Tried to get breakfast & food. Dispatch wouldn't allow us to go to Rand Ranch 2 for food. 0600 hours began working - building line around Slawgoski's haystacks and recon line constructed during ~~line~~ night.
	Road transports w/dozers to get lines constructed around the maintenance station on Willow Creek; 2 story house on hot Creek; and ~~Fo~~ Foreland as well to south.
	AT 0600 met w/ Charles Scott our objectives were to get lines around all structures that had a potential threat. Then start flanking the fire building line.

8/6/99.

8. ~~ACTIVITY LOG~~ (CONTINUE ON REVERSE)

TIME	MAJOR EVENTS
	Got line constructed around all structures from Slowgoski's Ranch North to Foreland O.I. well above maintenance station - which were structure that had greatest threat at time.
	Once structures line dy began constructing dozer line from Indian - Pony Creek southward toward Willow Creek by the NDF dozer #1, NDF dozer #2 was constructing line from maintenance station Willow Creek to Indian-Pony Creek. BLM dozer transported back to Slowgoski's ranch tied line together around Slowgoski's ranch started constructing line southward toward Bruffey Ranch.
	Approximately two hours fire blew out down by Sabbrowich's Ranch South of Bruffey Ranch.

9. PREPARED BY (NAME AND POSITION)

ICS 214 8-80

NFES 1337

TIME	MAJOR EVENTS

BLM dozer finish building line off of - above dry Creek & to dry Creek. Quit building line picked up Union Pass Road and high-tracked it to Sestinaviches Ranch. Engines were already on the blow out at Sestinaviches ranch trying to put in a wet line when I arrived w/ BLM dozer. Other 2 NDF dozers were being loaded onto transport and being transported to Sestinaviches Ranch.

Once at Sestinaviches Ranch I began building a direct line around the fire w/ the engines providing the BLM dozer + support to hold the line.

Once NDF dozer #1 arrived on scene he tied 1 flank of the fire back into the mountain range + mop line. Then he bumped up to leap frog putting in line w/ the BLM dozer. I had already put in several

Once NDF dozer #2 arrived at Sestinaviches he built line around the Ranch house and started building line between the Sestinavich Ranch + Bruffey Ranch.

Type 2 team was taking over in the morning

Around 2000 hours ~~I~~ Will Johnston started pulling the engines off the line to get a meal and sleep at the Rand ICP, since we hadn't eaten or slept for a while. Both dozers went off the line, since I was unable to direct the BLM relief dozer operator to the location of the dozers. I sent both dozers down off the line to the highway to tie in w/ Will Johnston. I hitched a ride w/ Ruby MTN 55 - engine to get off the ridge.

The dozer operators moved the transports that night in prep for the next days operations in case dozers needed to be moved around + fueled dozers.

I spent 3½ hours w/ Ruby MTN 55 trying to find our way off the mountain. Arrived at camp 0330 hours last into camp.

TIME	MAJOR EVENTS
8/8/99	
1130	Receive word: Storey's team assigned the Sadler Fire
1400	Handoff briefing by Elko District
	Scarfed maps & had OPS Meeting in DM briefing room
1800	Begin drive to Horse & Pine Fires
1730	~~Dee~~ Arrive ICP on Hwy 278 after a detour
	thru Palisades & Humboldt River canyon.
	Get in Davenport's jeep & drive South.
1900	Arrive Near Horse & Pine Fires. Talk to DIVS Buhler and
	a watertender guy. Drive thru burn & try to map it.
2100	Arrive @ ICP. Talk w/ Paul Hefner & Jeff Luff. They Need a
	Nite Ops to take care of the NDF task force. & local VFD's
2200	Drive out to the Fire Station w/ Bud Derham
2230	Talked about Ranches w/ local Volunteer firemen
2245	Got a list of all NDF engines in ~~Sadler~~ Task Force

NFES 1337

TIME	MAJOR EVENTS
2330	Watched the Dozer cut line around a ranch house
2400	Derham drove up Trout Creek w/local guy
	I went to Plans & gave list of resources & sought
	More info for tomorrow's Plan.
0100	Found Derham & we looked for Hay Ranch & the
	Tunneral ranch - Derham had seen cowboys & Patsy 3 Miles up
~~0120~~	~~Return to ICP~~ the Trout Creek.
0130	the NCF engines were Parked for the Night @ the Tunneral Ranch
	No More Dozing tonite.
0145	Return to ICP. ~~Bed~~
0200	Off duty Off radio.
	(@ 0230 Some local rancher women came into Plans
	and wanted "help" fighting the fire. Plans looked for
	Me & couldn't find Me. & guess Roupe talked to them)

TIME	MAJOR EVENTS
0600	Shift briefing @ ICP ; Handoff from Type II to Type I
	Much discussion what resources are where and whose
	in charge of what. Passed info from Last Nite to day DIVS
0730	Drive to Jiggs - Jim a DIVS on Huters branch
0900	Arrive Jiggs - take Recon flight w/ Huter
1000	Begin drive to Idaho Wells. Got directions from
	Ruby Mtn. bottled Water warehouse.
1200	Arrive Squaw Mtn. after crossing Cedar Ridge + the
	Wilderness Study Area.
	Spoke w/ Dozer [illegible] support guy. The Heitman Dozer was
	already cutting line downhill - before I was going to instruct -
	w/ DOZER Snow in the lead.
1220.	NV TF#3 arrives (2 tenders and 5 Engines) USAF Water
	tender [illegible] rolled a tire off its rim. - Waiting for New tire.

NFES 1337

8/9/99

TIME	MAJOR EVENTS
1235	Lathrop (from NDF) is Firing Boss and begins to burn out ~~cat~~ from Cat line down hill to where the fire is bumping the CAT line. Perfect strong wind at our backs.
1315	DZ Dozer arrives from the Cat line & moves out again to improve the line and go to Crane Springs
1325	talk w/ Lathrop about burning the ~~on~~ other corner of the Cat line junction.
1335	burn out started. talked w/ Tom Vernon (READS) he drove down to Crane Springs
1410	Talked w/ remaining NDF engine - they will mop the line 2 more times
1430	talk w/ USAF water tender crew. They are waiting for a New Tire.
1510	Drove down Squaw Mtn rd. to the dozer stuck in a Spring.
1600	Arrive @ Crane Springs - I think, 2 WT and a CAT were standing by
1640	copied radio TX of Fuels + ops about demobing a crew - Now.
1645	Drove North toward Indian Wells - (I thought, Indian Wells was actually over one "Mtn" range to the east)
1650	Met Rick Dolphin of Smoky Bear Hot Shots along the line - they were burning out.
1800	Met Del Rosa(?) Shots + they pointed Me North Passed by 2 large Safety Zones.
1730	Arrived at the last of an air show (SEAT drop) they hooked it. (I had passed the area of the burnover of the GNP#3 crew) Got lost in a desert subdivision.
1800	Arrive @ Reservoir (Twin Bridges)
1830	Arrive Jiggs Base Camp. Found Alex Naar Making a phone call. Talked about burnover. I told him & warned Make sure they got to Elko + to a Motel room. The rest of his crew arrived in Helicopters from Indian Wells. Waiting for New Bus as theirs had broken down.
1930	Talked w/ Alex, Tim Horton & Shepherd trying to get those 2 to loosen up & dispel ~~their~~ the anger of Naar and the defenses of Horton. I said it was understandable that they were upset. Shepherd said it was Nobody's fault.

ACTIVITY LOG (CONTINUE ON REVERSE)

TIME	MAJOR EVENTS
8/9/99	AFTER a prep period (with cigars) of approx. 6 hrs a line was completed (East-West) across the head of Div Q. Approx. line distance was 1½ miles. Instructed Tom Shepard Div L that he had control of burning operation. Safety meeting / planning meeting with Div Q and C/P-3 crews (2 type 2 crews). After a meeting to determine lighting direction, Div. L decided to light from the East to West. During Safety briefing it was decided that the burning crew would stay on Crew net & burn boss would scan tactical freq. After approx. ½ hr. of crew's departure I drove to a small ridge on the tractor line to observe operation. I observed crew lighting around a corner working towards my location. I also observed a fire rehind starting approx. 400 yds from the burning crew, the direction of the travel toward the crew. I attempted to inform crew of danger but I got no response. Back

NFES 1337

the fire whirl seemed to pass a little to the East of the crew, the air cleared and I could see some of the crew pulling there fire shelters (in the unburned area), I was yelling and waving my arms to get their attention, to escape in my direction after a short time they seen me and ran over to me. I gave O2 and a trama bag to a crew members who administer to 2 individuals. I had them removed by my pickup down fire line to safety, I had for a medical transport for 2 personnel. Later I had a the crew members flown of the fire by helicopter.

8. ACTIVITY LOG (CONTINUE ON REVERSE)

TIME	MAJOR EVENTS
0900-1100	Inversion lifted and fire began actively running and picking up in intensity. Predicted winds had not surfaced as of yet, Haines Index of 6 accurately predicted unstable atmospheric conditions. 3-4 smoke plumes were clearly visible in Divisions M s/L.
1100-1300	Assisted rancher in assessment of threat to ranch structures in Division L. Hotshot crew was burning out fireline behind dozers along flank of fire on the ranch.
1300-1630	Proceeded to Elko, Nevada to tie in with IMET at the National Weather-

Unit Log

Sadler Complex – 8/9/99, Dayshift 0600 – 1800
Fire Behavior Section – Chuck Mark

1300–1630 Service. Afterwards proceeded to northeast corner of fire. Fire blew out towards Dixie Creek, approximately 100–150 acres. ROS → 120–140 chains/hour, Flame Lengths → 10–20 feet, in mostly sagebrush/grass fuels.

1630–1800 Fire blew out on west side past Trout Creek SE up towards Lee Canyon. Blowup gained around 12,000 acres. Plume-dominated fire behavior, southerly winds never surfaced.
